CNC MACHINES | EXPO

June 26 - 27, 2019
10:00am to 4:00pm

1865 Corporate Drive, Suite 225
Norcross, GA USA

You're invited to our annual CNC Expo in Atlanta, Georgia. Come view the latest line of CNC routers and Waterjets AXYZ has to offer.

Workshops include Sign Production, Aluminum Processing, Plastic Fabrication, Aluminum Composite Processing, Phenolic Based Cladding Fabrication and Waterjet Cutting.

Any questions on material processing, machine configuration, software or tooling?

Now is the time to come and meet our CNC technical experts!

Complimentary refreshments and a catered lunch will be provided, as well as door prizes and a number of give-a-ways.

DAY 1:

10:30 am - TRIDENT - Print Finishing & Foam Cutting

Today's sign shop's most important tool. Offering a heavy-duty router with a 10 position tool changer, oscillating knife, tangential knife, and camera registration system.

- POP Display fabrication on Encore foam board, Palboard multi-layer PVC, and Falconboard corrugated graphics board.
- Routing and knife cutting thick foam packaging.

11:30 am - CNC Router Machine Maintenance

- How to perform regular inspections.
- What daily tasks to perform to extend service after 6 months.
- Which maintenance service package to choose that works best for your machine.

1:00 pm - TRIDENT - Wood Cutting

A popular, highly configurable choice for processing all types of woods, plastics and non-ferrous metals.

- Woodworking Cabinetry on Melamine and Plywood, featuring KCD software.

DAY 2:

10:00 am - TRIDENT - Heavy Duty Machining

A heavy-duty machine that is precision driven for premium quality non-ferrous metals and plastic materials.

- 2D & 2 1/2 D machining on Coastal Enterprises Precision Board (HDU)
- Machine pocketing and routing on 1/4 - 1/2" aluminum.
- Evonik Acrylite Acrylic processing to ensure a clean cut edge.

11:00 am - PANELBuilder - World's Leading Panel Fabrication System

Specializes in processing large volumes of aluminum and phenolic cladding material quickly and efficiently.

- Alpolic ACM cladding, featuring Carter's Architectural Panels extrusion systems.

12:00 pm - CNC Router Machine Maintenance

- How to perform regular inspections.
- What daily tasks to perform to extend service after 6 months.
- Which maintenance service package to choose that works best for your machine.

1:00 pm - E-1515 Waterjet Cutting

A waterjet solution built for speed, accuracy and strength, cutting with abrasive and water only.

- Using waterjet technology to cut 1/4 - 1/2" aluminum, 3/4" stone, 2" foam, 1/4" mild steel.

2:00 pm - Waterjet Maintenance

- How to perform regular inspections of your cutting head.
- How to change the high pressure seals in the intensifier.
