Infinite CNC Router

October 2, 2019, Moncton NB | October 9, 2019, Dartmouth NS

The newest addition to the XYZ line of products, the Infinite Router builds on the legacy of the XYZ Series to make it even better. Redesigned from the ground up, it's the ideal solution for one-off, small batch production as well as high volume applications. Versatile, customisable and capable of handling the most challenging jobs. With process areas up to 128" wide by 50' long and beyond, we offer solutions to suit your exact application and budget.

Scheduled CNC Router Demonstrations:

10:00 AM: Wood

11:00 AM: Printed Encore Foam

12:00 PM: Evonik Acrylic

1:00 PM: Aluminum

2:00 PM: CNC Router Machine Maintenance Workshop:

An overview on how to perform regular inspections to our CNC Router. What daily tasks to perform to extended service after 6 months. Which maintenance service package to choose that works best for your machine.

A-0612 Waterjet

October 9, 2019, Dartmouth NS

Check out the latest waterjet technology - incredibly powerful and unbelievably compact, the A-0612 waterjet. The space-saving design features an integrated abrasive feed system with optional water-level control and an abrasive removal system. We will be showcasing the latest software, MOVE™ and how it works with our robust A-0612 waterjet machine.

- Drag and drop part loading
- Move and rotate parts with your fingers
- Zoom into your cutting area with a pinch

Come and meet our Waterjet Specialist to book a private demonstration, or custom sample cutting to test your material. Learn how waterjets can increase your bottom line and boost productivity.

Complimentary refreshments and a catered lunch will be provided.
