24 World's Fair Drive, Suite D
Nov 11: PANELBuilder Software
Nov 12: CNC Machine Demos
**Waterjets will not be present

RSVP at openhouse@axyz.com or call 1-800-361-3408

9 AM - 4 PM: PANELBUILDER SOFTWARE TRAINING - \$650 US

We are offering a special one day PANELBuilder software training at a discount rate of **\$650 US per person**. This is a 6-hour course in a classroom setting designed to provide you with a working knowledge of the PANELBuilder solution. Laptops will be provided to use during training. Training will be available at select locations – **New Jersey, and Texas**. Space is limited and offered on a first come, first serve basis. Catered lunch will be provided.

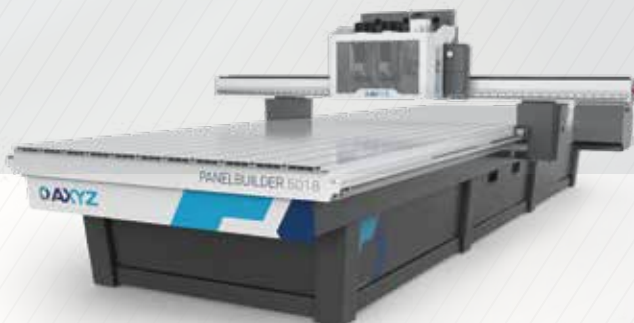

Best Practices Covered on the Following Topics:

- User Interface Configuration and Overview
- 2D Drafting and DXF Import Methods
- Automatic Tooling Parameters
- Manual Tooling Flexibility
- Configuring Automatic Cut Order
- Program Compilation, Verification & Output
- Tool and Sheet Libraries
- Nesting (Automatic & Manual)
- Project Workflow
- ...and Much More

Automated Label Printer & PANELTracker

From layout to shipping, this new app tracks panels as they move through the fabrication process and across the factory floor.

- Label Creation
- Project Creation
- Panel Tracking

10 AM - 4 PM: CNC MACHINE DEMONSTRATIONS - FREE

Open to anyone interested in seeing a CNC router or waterjet in action. Watch live demos, and consult with industry experts. If you have any questions on material processing, machine configuration, software, or tooling, now is the time to get them answered. Catered lunch will also be provided.

CNC Router/Knife Cutting Demonstrations Include:

Cladding Fabrication - Routing Alpolic aluminum composite, high pressure laminate and aluminum

POP Display Fabrication - Knife Cutting Encore Foam Board, Palboard, & Falconboard

Foam Packaging - Routing and knife cutting thick foam packaging from Worldwide Foam

Nonferrous Metal Processing - Pocketing, drilling, and profiling ¼"-½" aluminum plate

Acrylic Fabrication - Routing to ensure a clean cut edge

Waterjet Demonstrations Include:

Cutting - Aluminum, Stone, Steel, and Foam from Worldwide Foam

Programming - Overview of job planning

Controller - Functionality Overview

Maintenance - Complete overview of best practices

Configurations - Overview of WARDJet Product Line

***Waterjet demonstrations unavailable in New Jersey*
